On Transitions in High Energy Nuclear Collisions; News from NA61/SHINE at CERN SPS

Tuesday, 9 January 2018 17:00 (45)

NA61/SHINE is a fixed target experiment at the CERN SPS. The main goals of the experiment is to discover the critical point of hadronic matter and to study the properties of the onset of deconfinemnt. Prof. Gazdzicki is the spokesperson of the NA61/SHINE Collaboration.

Presenter(s) : Prof. GAŹDZICKI, Marek (Jan Kochanowski University and Frankfurt University)
